Education

National Institute of Technology (NIT) Calicut

M.Tech in Computer Science and Engineering (Information Security)

CGPA: 6.98/10

2025–present

Gokaraju Rangaraju Institute of Engineering and Technology

B.Tech in Computer Science and Engineering

CGPA: 8.30/10

2020–2024

Sri Chaitanya Junior Kalasala

Intermediate, Telangana

84.9%

2017–2019

Gowtham Model School

Board of Secondary Education, Telangana

GPA: 9.0/10

2017

Projects

Localization of Code Hallucinations in LLM-Based Code Translation — *On Going*

- Developing a token-level localization system to pinpoint Knowledge-Conflicting hallucinations in LLM-generated Java-to-C# translations using entropy signals from StarCoder2.
- Building an annotated dataset of hallucinated code pairs labeled with exact line numbers and token indices; evaluating using token-level precision, recall, and Top-K accuracy metrics.

NITC Assessment Management System — *MERN Stack (MongoDB, Express.js, React.js, Node.js)*

- Built a full-stack platform to manage academic evaluations at NIT Calicut with secure NITC email-based faculty authentication using JWT.
- Implemented automated candidate–evaluator mapping, seating arrangement generation, and role-based dashboards for score entry and report download.

LOGSENTINEL — *Python, Intelligent Agent Design*

- Developed an autonomous log monitoring agent that detects abnormal system behavior using utility-based reasoning over structured tool outputs.
- Implemented traceable step-by-step agent execution with alert generation categorized by severity (INFO, WARN, ERROR).

System Privilege Security Lab — *Docker, Linux, C, GDB, Bash*

- Explored how access and privilege are controlled across three system layers — container users in Docker, file permissions in Linux, and program control-flow in C.
- Set up isolated environments to test each layer: switching container users, granting/restricting file access, and tracing execution to see how unchecked input could hijack a running program.

Technical Skills

- **Programming Languages:** Proficient in Python, Java and C.
- **Data Structures and Algorithms**
- **Frontend:** JavaScript, HTML5, CSS3, ReactJS.
- **Backend:** NodeJS, ExpressJS
- **Machine Learning:** Exposure to LLMs, GenAI, and Agentic AI system design.
- **Databases:** SQL, MongoDB
- **Version Control:** Git, GitHub

Achievements and Awards

- Solved 300+ coding problems on LeetCode and GFG.
- 5-star Problem Solver on HackerRank.
- AICTE–EduSkills AWS Cloud Virtual Internship (10 weeks).

Coursework

• DBMS • OOPs • Operating Systems • Computer Networks
